# Roll in

A Software Engineer Journey

# Ramp up Receipt

- A. Culture
- B. Methods
- C. Product functional perimeter
- D. New technical stuff

A. Meetings

B. Documentation

C. (A lot of) legacy code

My pairs go with me all  
the way.

# I learn on the codebase.

I start coding (almost)  
the first day.

# Day-to-Day Work

A Software Engineer Journey

Production is my favorite place on the internet. I LOVE production. YOU should love production. You should go as early, and often, as possible. Bring the kids, the whole family.

Josh Long  
@starbuxman

Have a sustainable pace

Do what I love: code

# Roll off

A Software Engineer Journey

**I HEARD YOU'RE  
LEAVING**

**GOOD**

I have been enabled by the team

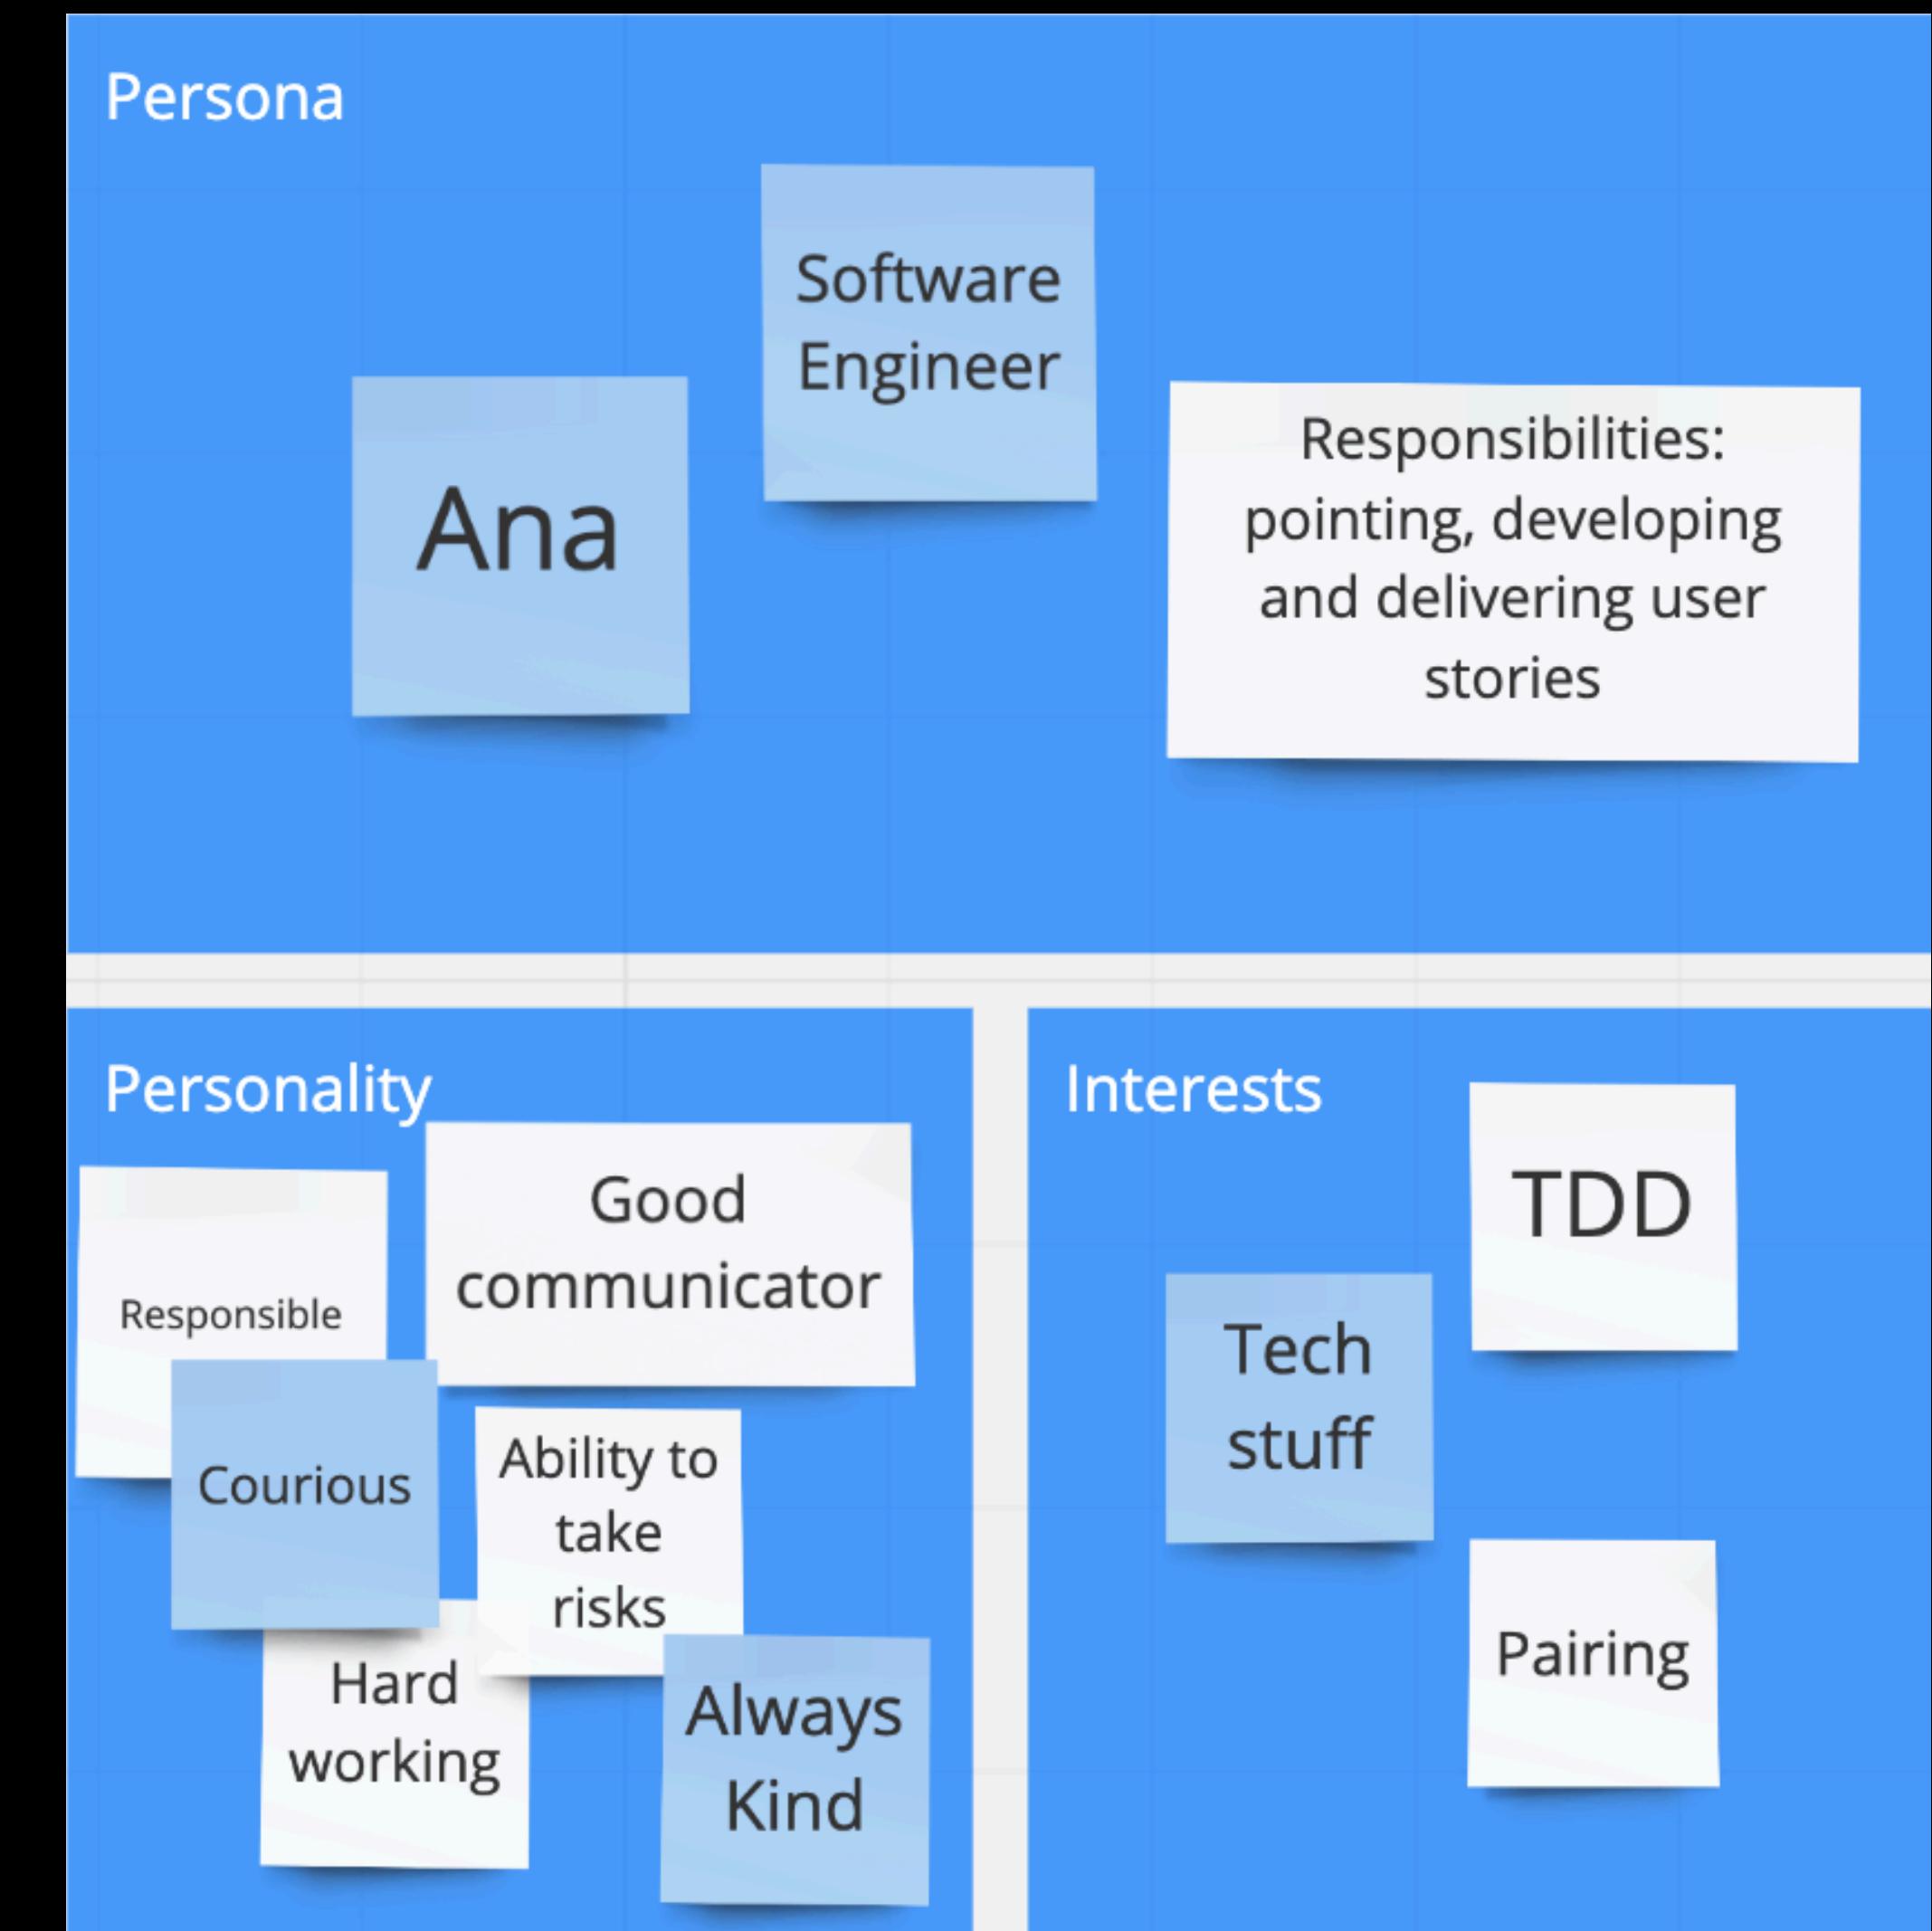

I did my best for the product success

# Let's code

A Software Engineer Journey

# Pairing Application

Ana can pair

Delivered:

**“Add a team, add un engineer to the team and list teams engineers.”**

In progress:

**“Split engineers into pairs.”**

- A. Execute all @tests.
- B. Use them to explain the context to my new pair.
- C. Add PairingControllerTest and implement @test. Make it fail.
- D. Implement PairingController. Make @test pass.
- E. Add PairingApplicationServiceTest and implement @test. Make it fail.
- F. Implement PairingApplicationService. Make @test pass.
- G. Add PairingServiceTest and implement @test. Make it fail.

- A. Execute all @tests.
- B. Use them to explain the context to my new pair.
- C. Implement PairingService. Make @test pass.
- D. Execute all @tests.
- E. Run application.
- F. Deliver to production.

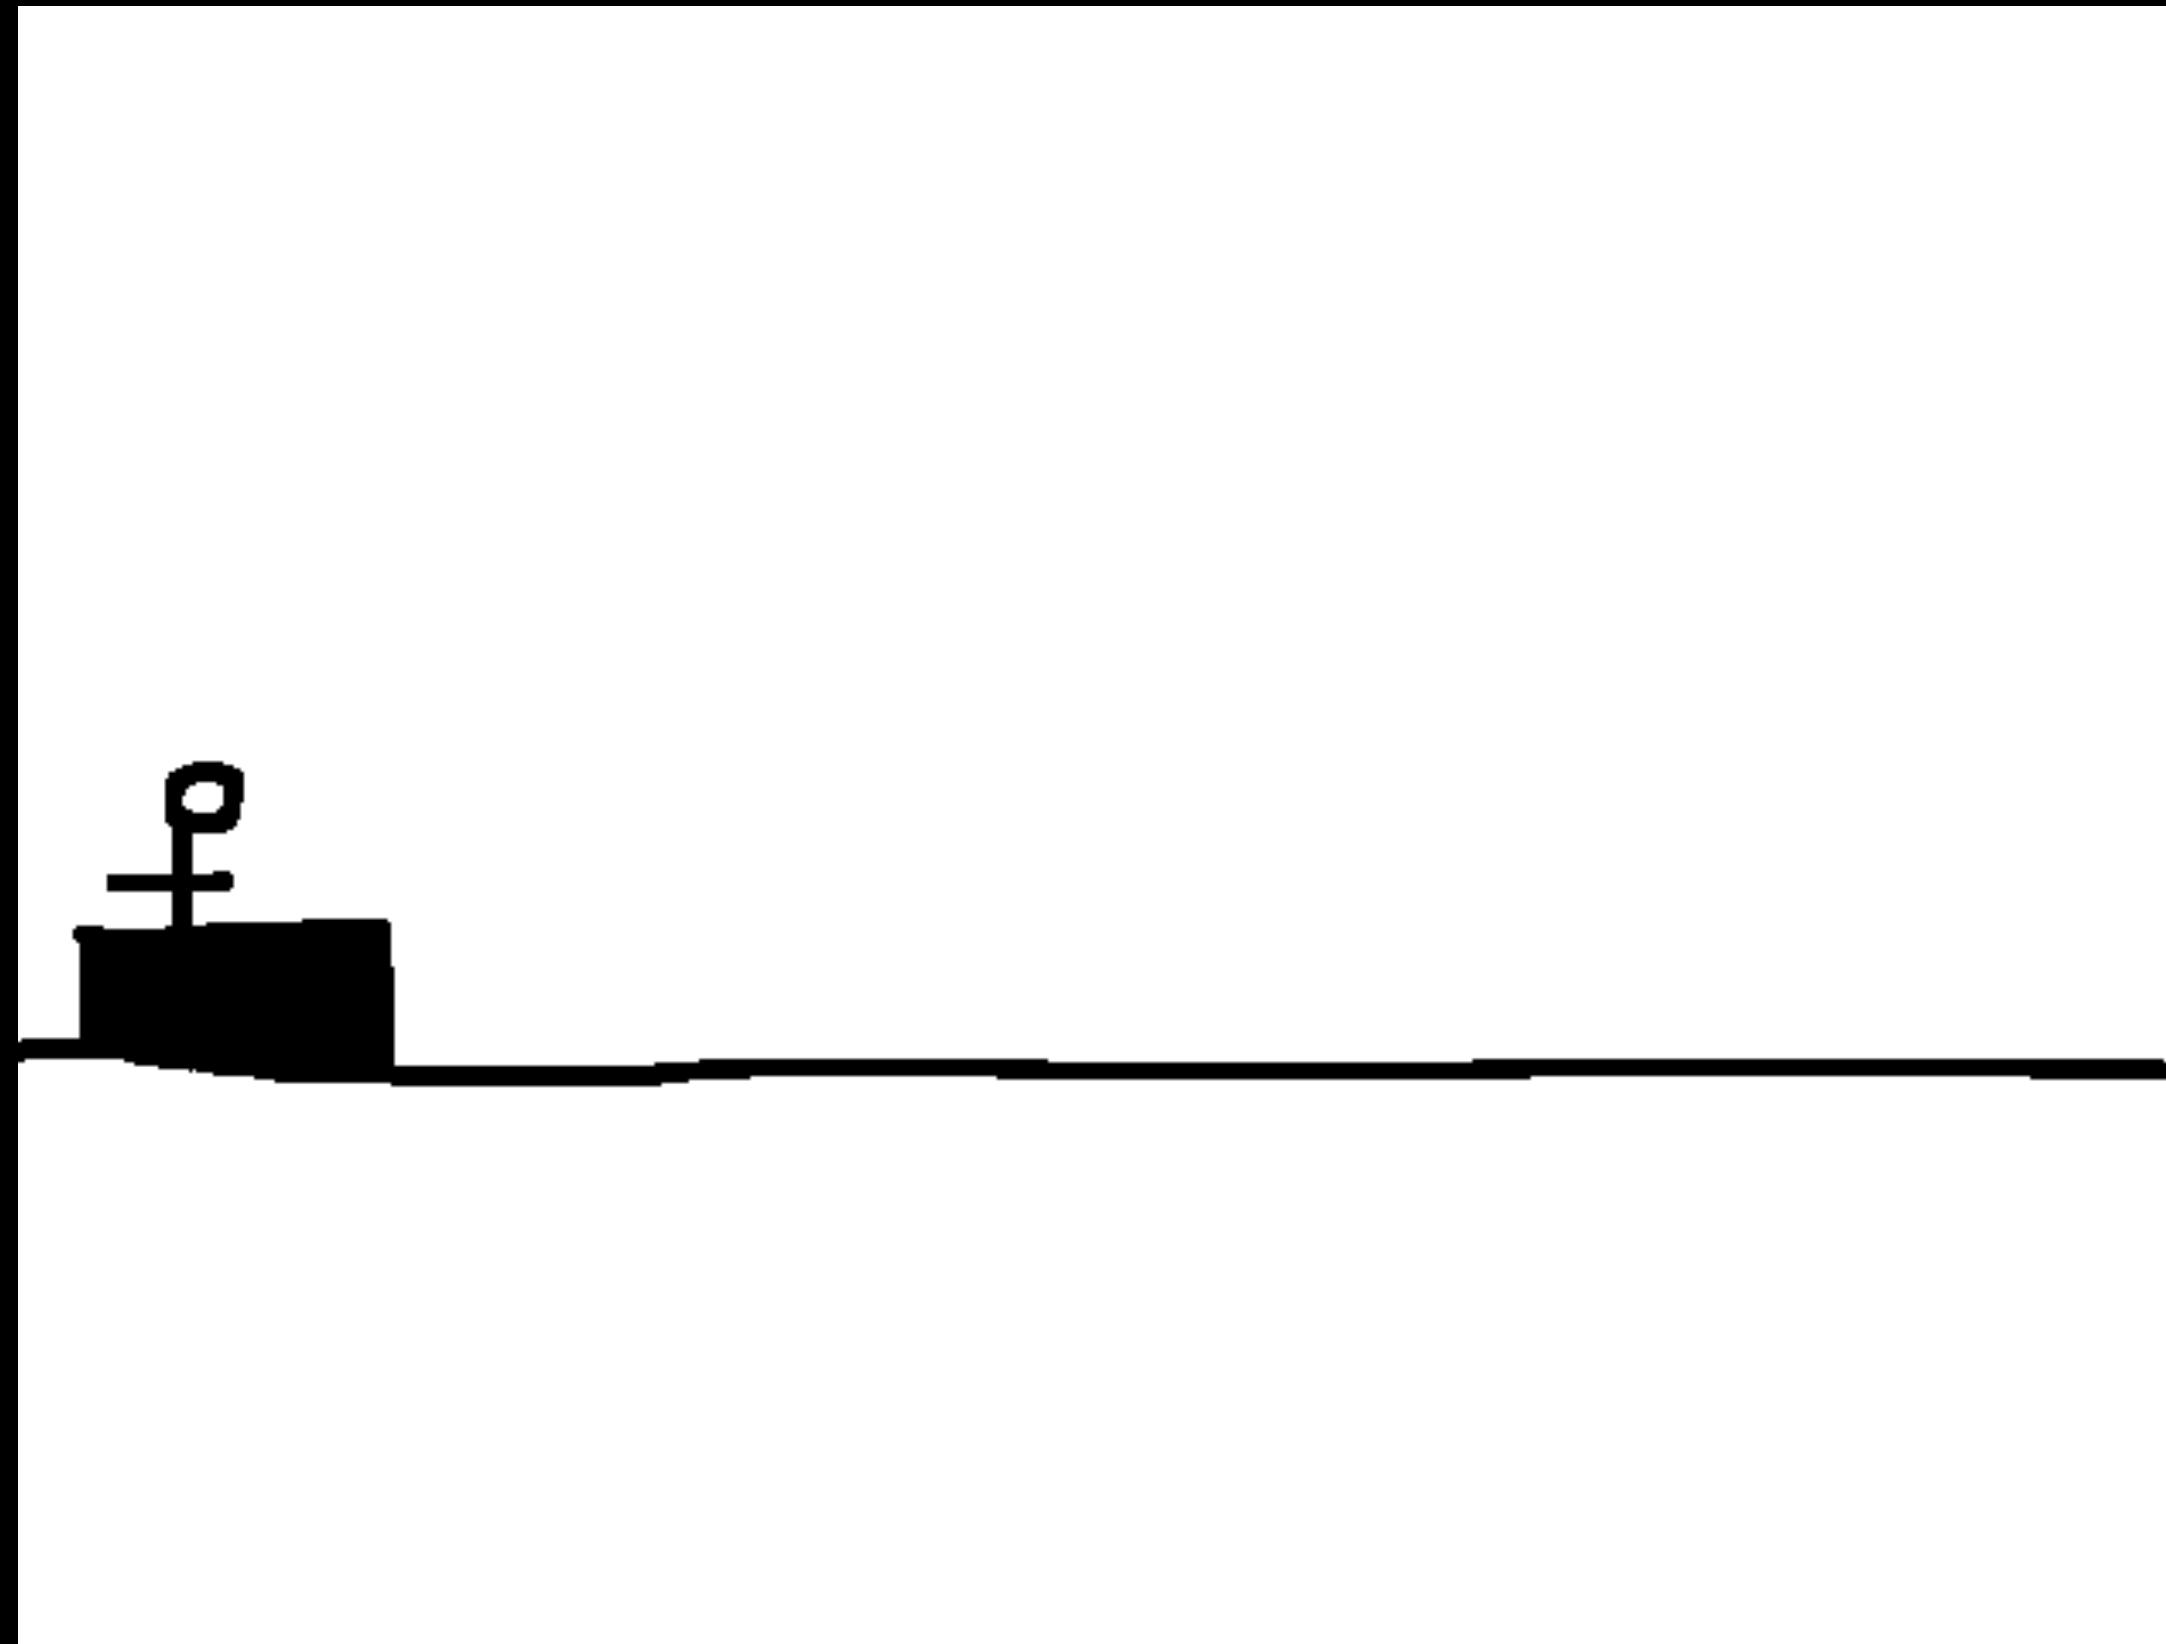

# What I've learned

A Software Engineer Journey

**“You need to give up something to succeed as a team.”**

*-Alberto Brandolini*

Any simple questions?
